- Learning C# for Unity & Unreal Engine Game Development.
- Learning about the latest Web Development technologies.
- Gaining knowledge about project management.
- Contributing my skills in Web Application projects.

PROJECTS

Online Shopping Management System ⌁
The shopping management is an ecommerce platform where admins can upload products from the admin dashboard and users can buy items from them with cash on delivery system. The project also provides vendors to upload their products and gets reviewed by admins for verification purposes. The products are dynamically added from the database and also updated with product quantity as users buy from here. The project is also a progressive web app (pwa) which means users can install the web application on their laptops, phones, tablets etc.

Perfume Website ⬀

The project is made for a specific client. I have built the website using raw php procedural. For payment integrations I have used stripe payment gateway. Stripe powers online and in-person payment processing and financial solutions for businesses of all sizes.

Movie Ticket Booking System Online ⬀

The Online Movie Ticket Booking System is a web-based platform designed to simplify the process of purchasing movie tickets online. This system provides users with the ability to browse through available movies, access detailed information about each movie. I have added a php mail system into the project for login verification and stripes payment integration.

Food Delivery System Online ⬀

The project is made for clients. Users can order food and complete the payment process using bkash. Bkash provides safe, convenient and easy ways to make payments and money transfer services via mobile phones to both the unbanked and the banked people.
